BALTIMORE, MARYLAND

Introductory

We take
pleasure in
presenting to you
our New
Complete Catalogue
for
1909

IN presenting this book it is our intention to show such designs and sizes of exterior and interior work as we carry in stock, and are able to furnish promptly upon receipt of orders. Also other designs which we can furnish, but which are not carried in stock.

With our regular stock designs and sizes, and the patterns not carried in stock there are sufficient designs to enable you to select most anything needed without special drawings not always easy to furnish.

Soliciting your careful inspection of this catalogue and the complete price folder, also a liberal portion of your orders, we are,

Yours respectfully,

Baltimore Sash and Door
Company

Order by Number Only

WE assume that
the Numbers of
Designs Mentioned
on Your Orders or
Inquiries are taken
from this Book unless
otherwise specified

Do Not Cut This Book

OFFICIAL GRADES

SASH, DOORS AND BLINDS

*Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association
of the Northwest.*

DOORS.

AAA. Oil Finish Doors—Material for AAA Oil Finish Doors must be Clear, no white sap admitted. Workmanship must be good.

AA. Oil Finish Doors—Material for AA Oil Finish Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of any one piece. Workmanship must be good.

No. 1 Quality.—Material in No. 1 Doors must be Clear, with the exception that water stains and small pin knots not exceeding one-fourth ($\frac{1}{4}$) inch in diameter may be admitted. No piece to contain more than two (2) such defects and no door more than five (5) such defects on each side; white sap not considered a defect. Workmanship must be good.

No. 2 Quality.—Material in No. 2 Doors may contain knots not to exceed one (1) inch in diameter, and blue sap showing on both sides not to exceed fifty (50) per cent in any one piece of the door and gum spots showing on one (1) side of a piece only and other slight defects shall not exceed ten (10) in number on each side and each white pine stile, bottom and lock rail must contain at least one (1) and not to exceed three (3) such defects, plugs admitted and not regarded as a defect. Slight defects in workmanship admitted.

No. 3 Quality.—Material in No. 3 Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and three-fourths ($1\frac{3}{4}$) inches in diameter. Twenty (20) defects may be allowed on each side; also slight defects in workmanship. Each piece of white pine in a No. 3 Door must contain a defect. Not more than six (6) defects allowed in any one piece.

No. 4 Quality.—No. 4 Doors are regarded as a cull door and must contain large coarse knots and may contain rot, worm holes, shake and other serious defects.

A Standard Door may be through tennon, blind tennon or dowed.

WINDOWS.

Check Rail Windows may contain two (2) knots three-eighths ($\frac{3}{8}$) inch in diameter or one red knot five-eighths ($\frac{5}{8}$) inch in diameter in each piece of a window. White sap and not over thirty-three and one-third ($33\frac{1}{3}$) per cent blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

BLINDS.

No. 1 Outside Blinds must be made of Clear lumber except that small sound pin knots, water stain and white sap may be admitted. Workmanship must be good.

WOODS ADMISSIBLE.

Woods other than **Michigan, Wisconsin** and **Minnesota** or **Western White Pine** admitted in Doors, Blinds and Windows except in Oil Finish Goods.

DIRECTIONS FOR ORDERING

Time, Annoyance and Expense can be Saved by Noting and Following Closely the Suggestions Below:

We will understand all orders and inquiries as calling for **Regular Style** and **Sizes** as described in this catalogue, unless specifically ordered otherwise, or unless covered by standing instructions to the contrary.

Be Explicit in ordering. Do not assume that we know what you want.

Always give **width** first, length or height second, then thickness.

Always use inches to designate glass sizes, and feet and inches for openings or outside measurements.

SASH and WINDOW.

The term "Sash" indicates only one piece to fill opening.

The term "Window" indicates two pieces (upper and lower sash).

State size of glass, number of lights, opening (unless regular stock) and thickness. State whether open or glazed, and if glazed whether of single or double strength.

If a window whether check or plain rail.

If segment or circle head give number of style desired (see page 44) and radius of circle or segment if not regular. When not otherwise specified we will understand for Circle Head Style Fig. 2 with a radius one-half the width of

the sash less the width of the stile, and for Segment Head Fig. 4 with a radius the width of the sash less the width of the stile.

When an odd sash or window is ordered always give both glass size and number of lights and outside opening, and if possible send sketch.

If glass sizes only are given we will understand that regular stock widths of stiles, rails and bars are required.

Note—All windows and sash are understood to be glazed unless ordered open specifically. All glazed windows are primed or oiled one coat unless otherwise ordered.

DOORS.

In the absence of fuller instructions we will consider an order or inquiry for doors to call for the Standard Four Panel O. G. Door No. 1 quality.

State width, height and thickness, number of panels and arrangement of same and quality.

If molded state whether flush or raised mold one or two sides.

State style of sticking unless O. G. is desired.

If oil finish state whether machine smoothed or hand smoothed is desired.

If odd send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels unless specifically ordered otherwise.

OUTSIDE BLINDS.

We will understand all orders for blinds to call for Regular Western Stock Styles and Sizes, 1½ inch rolling slats unless specifically ordered otherwise.

State size and number of lights of window for which blinds are ordered, also thickness of blind, and whether all rolling slats (R. S.), stationary slats (S. S.), or half rolling and half stationary (½ R. S. ½ S. S.)

If odd give outside opening, thickness, arrangement of slats and send sketch.

The regular stock blind is the width of the window to be covered and one inch longer.

Orders for brick buildings must so specify, and will in the absence of additional instructions be made two inches longer than window opening.

A blind indicates a single piece to fill opening.

A pair of blinds indicates two pieces to fold together to fill opening.

A set of blinds indicates more than two pieces, and should always be accompanied by sketch.

INSIDE BLINDS.

Inside blinds we will understand are to be made four-fold, 1½ inch thick, outside panel and inside slats; made to be cut in the center unless otherwise stated.

Give exact outside opening always, thickness, number of folds and arrangement of panels or slats (see page 93), always send sketch.

If cut twice or more specify height from top to each cut.

If wanted to fold into box give width of outside folds.

If not the usual arrangement of panels or slats (see page 93), always send sketch.

LISTED SIZES OF

TWELVE LIGHT PLAIN RAIL WINDOWS $1\frac{1}{8}$ inches Thick.

Send for prices, giving outside measures and thickness of each check rail window, single sash, and transoms; and when ordering also give width of mullions, thickness of transom bar in frame, and if circular or segment top, the radius.

LIST PRICE on QUEEN ANNE WINDOWS

For list prices of Queen Anne Windows of designs as shown on pages 40 and 41, either open or glazed, figure the list on a two-light window of similar size, open or glazed as required, and add as below :

Design No.	1½-inch List	1¾-inch List
134.....	\$3.00	\$4.20
135.....	4.60	6.45
136.....	3.80	6.10
137.....	2.60	3.65
138.....	10.40	14.55
139.....	7.20	10.10
140.....	6.30	8.80
141.....	5.00	7.00
142.....	9.10	12.75
143.....	11.00	15.40
144.....	3.50	4.90
145.....	35.20	49.25
146.....	7.90	11.05
147.....	13.00	18.20
148.....	6.40	8.95

All designs except Nos. 134, 138 and 144 wider than 28-inch glass will be made with greater number of lights in proportion to the width and charged for according to Rule 11, page 50.

PRICES on QUEEN ANNE SASH

For prices see Rule 11, page 50.

In making Queen Anne Sash, number of lights will be varied according to size of sash, unless otherwise specified.

LISTS on SEGMENT, CIRCLE and GOTHIC TRANSOMS

For lists on segment, circle and gothic transoms, open or glazed, of designs as shown on page 43, form list on a one-light square top transom, open or glazed as required, and add as below :

For Design No. 161 or 162 see Sash Extras, Rule 4, page 49.

“ “ 163 or 164 see Sash Extras, Rule 5, page 49.

“ “ 165 see Sash Extras, Rule 5, page 49, and add \$2.50 list for 1½-inch, \$3.50 list for 1¾-inch.

“ “ 166 see Sash Extras, Rule 5, page 49, using list for two half circles and Rule 11, notes A and B, page 50.

“ “ 167 see Sash Extras, Rule 5, page 49, and add \$4.80 list for 1½-inch, \$6.70 list for 1¾-inch, for sizes not over 5 feet in width.

If above windows or sash are glazed with white chipped, enameled, or with colored glass (any color except ruby), add to D. S. glazed list formed as above for each square foot of glass measure in the window, 40c list.

If glazed with ruby, add for each square foot, 70c list.

For similar designs with a different number of lights see Rule 11 of Sash Extras, page 50.

SASH EXTRAS

NOTE "A"—When the term "Stock Quantities" is used in these rules, it means ten or more of the articles of one size, style and quality.

NOTE "B"—For irregular or intermediate sizes in stock quantities, use same list as next larger listed size, both open and glazed.

For less than stock quantities, on sizes not listed, an extra 10% of the open list will be charged.

NOTE "C"—Unless otherwise specified, when a net extra or a list extra is provided, it will apply to either open or glazed list, and when a percentage of the list is provided, it applies to open list only, and should be applied before glazing is added.

LARGER SIZES.

RULE 1.—(a) For list on $1\frac{1}{2}$ and $1\frac{3}{8}$ inch open windows wider than listed sizes, add to the open list for similar window of widest listed size of same height, for each additional 4 inches or part thereof..... **50c list**

(b) For list on $1\frac{1}{2}$ and $1\frac{3}{8}$ inch open windows longer than listed sizes, add to the open list for similar window of longest listed size of same width, for each additional 4 inches or part thereof..... **50c list**

WIDE STILES, RAILS OR BARS.

RULE 2.—For list on $1\frac{3}{8}$ inch open windows, or sash, with stiles, rails or bars wider than regular stock sizes, add as follows:

(a) For stiles and top rails wider than 2 inches to glass rabbet, for each additional $\frac{1}{4}$ inch or part thereof, add of the open list to open or glazed list..... **10% list**

(b) For bottom rails wider than 3 inches to glass rabbet, for each additional $\frac{1}{2}$ inch or part thereof, add of the open list to open or glazed list. **7½% list**

(c) For check rails thicker than $1\frac{3}{8}$ inch and not over $1\frac{3}{4}$ inches finished sizes, add of open list to open or glazed list..... **20% list**

(d) For vertical bars wider than regular stock, for each additional $\frac{1}{4}$ inch or part thereof, add of open list to open or glazed list..... **5% list**

(e) For horizontal bars wider than regular stock, for each additional $\frac{1}{4}$ inch or part thereof, add of open list to open or glazed list..... **5% list**

NOTE—For rabbeting check rails see Rule 27, page 51.

O. G. LUGS.

RULE 3.—For list on $1\frac{3}{8}$ inch open or glazed windows with O. G. lugs, add to open or glazed list for each sash with lugs..... **50c list**

SEGMENT HEADS.

RULE 4.—For list on open or glazed windows or sash with segment or imitation segment heads (Fig. 3 or 4, page 44), add to open or glazed list the following:

	$1\frac{1}{2}$ inch list.	$1\frac{3}{4}$ inch list.
Up to 2-0½ wide (opening).....	\$1.80	\$2.50

DOOR EXTRAS

NOTE "A"—When the term "Stock Quantities" is used in these rules it means 10 or more of one size, style and quality.

NOTE "B"—For irregular or intermediate sizes, in stock quantities, use same list as next larger listed size. For less than stock quantities on sizes not listed, an extra 10% will be charged.

LARGER THAN LISTED.

- RULE 1.**—(a) For list on doors wider than listed sizes, use the list of a 3 foot door, same height, and add for each additional 6 inches or part thereof..... **25% list**
 (b) For list on doors longer than listed sizes, use the list of the longest similar door of same width, and add for each additional 6 inches or part thereof..... **15% list**
 (c) For single doors made to represent a pair, add..... **\$2.50 list**

THICK DOORS.

- RULE 2.**—(a) For 1¾ inch doors, not otherwise provided for, add of the 1⅜ inch four panel door list for same size..... **50% list**
 (b) For list on 2 or 2¼ inch doors (single or double thick) form list for a similar 1¾ inch door and add..... **50% list**
 (c) For list on 2½ inch door (single or double thick) form list for a similar 1¾ inch door and add..... **70% list**
 (d) For list extras on doors thicker than 1⅜ inches, where extras are specified as applying to 1⅜ inch doors, add for the different thicknesses same percentage as above.

WIDE STILES, RAILS OR MUNTS.

- RULE 3.**—(a) For 1⅜ inch doors with stiles and top rails wider than 4¾ inches (including solid mold) add for each additional 1 inch or part thereof..... **75c list**
 (b) For 1⅜ inch doors with cross rails (other than top, lock or bottom rails,) wider than 4¾ inches (including solid mold), add for each wide rail for each additional 1 inch or part thereof..... **15c list**
 (c) For 1⅜ in. doors with lock or bottom rails wider than 8⅝ or 9¾ inches respectively (including solid mold), add for each wide rail for each additional 1 inch or part thereof..... **25c list**
 (d) Sliding doors having one stile wider than regular, add per door ⅔ price in Note "A".

PANELS.

- RULE 4.**—(a) Arrangement of panels.
 Doors No. 200 and 201, over 3- 0 and not wider than 4- 0, 3 panels wide.

INSIDE FOLDING BLINDS

500
All Slats.

502
 $\frac{3}{4}$ Panel

DIRECTIONS FOR ORDERING.

First—In all cases give the exact outside measure of Blinds wanted.

Second—Give the number of folds.

Third—State if Blinds are to be all slats, or half panels and half slats.

Fourth—State distance from top of window to center of meeting rail of sash, or where Blinds are to be cut.

Fifth—Give thickness of Blinds.

Sixth—If Blinds fold in pockets, give size of pockets.

Seventh—State if Blinds are to be painted or finished in oil.

Eighth—If for oil finish, extra price.

501
 $\frac{1}{2}$ Panels, $\frac{1}{2}$ Slats.

503
All Panel.

INSIDE SLIDING BLINDS

Above section shows that no special frame is required to use our sliding blinds. The guideway is fastened on pulley stile, acting as a stop for the sash.

These sliding blinds are made $\frac{1}{2}$ inch in thickness, and though constructed of light material possess great strength and lasting qualities.

Can be closed with the window raised and cannot blow open or rattle, thus giving the best medium of ventilation.

They do not interfere with curtains or window ornaments, and admit light and air from any part of the window.

These blinds are specially made to order in the white or finished complete; either varnished in the natural colors of the different woods or stained and varnished, or wood filled and cabinet or rubbed finish.

PRICE LIST OF INSIDE SLIDING BLINDS

Oil Rubbed Cabinet Finish	1.50	1.85	2.10	2.70	3.25	3.80

STYLE.—We make blinds all panels, all slats or any combination of slats and panels. Panels are flat or raised. Slats are rolling or stationary.

NOTICE.—Panels will always be made **flat** unless specially ordered raised.

RAISED PANELS.—We make an additional charge for Raised Panels as follows: For each raised panel 6 cents additional.

DIRECTIONS FOR ORDERING.

Give the exact measurement of the opening which the blinds are to fill. Where guideways take the place of stops, state distance from face of casing to inner face of lower sash. If windows are circle head or segment inside, send exact pattern or give radius. Full information for adjusting these blinds accompany each order.

VICTORIA VENETIAN BLINDS

Essential improvements over all others. Made to order only.

Are made of thin wood slats hung on the best woven ladder tape; hang within window frames, between jambs or stop beads; are never swinging out in the room, "sticking fast" or "coming off the roller," and are perfectly noiseless, both in use and operation. Can be hung in old as well as new buildings by anyone.

It is seen that all the slats or any part of them can be instantly adjusted to admit light and air the full width and height of a window, or exclude it from the top, bottom or any part.

Are perfectly sanitary and can be as easily kept clean as any other piece of furniture.

Shows one of the many handsome effects that can be produced draping windows equipped with them. They are made from plain and fancy woods, finished natural, painted or enameled any color or tint desired, to match the finish of a room or building.

FIVE WAYS THE SLATS CAN BE ADJUSTED, AND STILL THERE ARE OTHERS.

No. 1, shows all slats closed.

No. 2, blinds half drawn, upper slats closed.

No. 3, lower slats closed, upper open.

No. 4, blinds entirely drawn.

No. 5, all slats turned to exclude the sun, and still admitting an abundance of light.

Made with slats 2 inches and also $2\frac{3}{8}$ inches wide. The former are intended for medium-sized windows in residences, etc. The latter width costs less, makes a lighter blind, and are intended for larger windows, such as are found in public buildings, etc. Either width is well adapted for any use.

For list prices see page 97.

VICTORIA VENETIAN BLINDS

List Prices of Latest Improved Victoria Venetian Blinds

With a nice varnish finish, complete with best quality woven ladder tape, and including all hardware for hanging.

No blind charged at less than 12 square feet.

MADE FROM	2½-inch Slats.	2-inch Slats.
Spruce, Whitewood, Basswood, Yellow and Norway Pine, finished natural, stained to imitate Cherry, Mahogany or Walnut, or painted in dark colors	\$0.19	\$0.21
Painted in light colors or tints	.21	.23
Painted in enamels	.24	.26
Enameled, rubbed between coats	.38	.40
White Pine, Cypress, Plain Oak, Ash, Elm, Chestnut and ordinary Maple	.21	.23
Plain Birch and Butternut	.22	.24
Quartered Oak and quartered Sycamore	.24	.26
Cherry, Black Walnut, California Redwood and White Ash	.30	.32
Red Mahogany, Curly Birch, Birdseye and White Maple	.38	.40

For rubbed finish add 3 cents per square foot to the above list.

Bronzed hardware lists at 25 cents per blind extra.

Where no preference is stated the blinds will be made from basswood, with slats 2 inches wide, which makes a very handsome blind.

Sliding Venetian Blinds also roll head blinds with or without tenoned slats cost extra.

In ordering give size of opening.

Reference can be made to the above cut to describe where dimensions are taken by saying if taken at "a", "b" or "c", and if taken at "c" how much lap was allowed on face of casing.

a—Between stop beads.

b—Between jambs.

c—Face of casing and tell how much if any lap has been allowed on each side.

Above cut illustrates how the slats can be tenoned on the ends to work in Rabbeted Guides, which we furnish for each side.

The guides keep blinds in place before an open window and are finished same as blinds and can be placed on stop beads or jambs, or used for window stops.

ROLL HEAD BLINDS

Are made with and also without tenoned slats. Have narrow strips of metal down through the slats instead of cords, concealed

behind the tape. When raising a blind these metal strips wind around the ROLL HEAD and at the same time the raising cord at the right unwinds thus keeping the slats perfectly horizontal.

The advantage of metal over cord is apparent and also makes a great difference in ease of operation.

To hang ROLL HEAD BLINDS is so wonderfully simple it is simply wonderful the way has not been used before; it is only necessary to put the slotted irons, attached to the blind on each side, over two screws previously placed in the stop beads or jambs.

The blind can be taken down by simply lifting it off the screws.

Store Fronts

ON the following pages will be found designs of Store Fronts of modern and tasteful types. The illustrations are clear, showing correctly the style of construction and we can furnish working details showing how to put same together at the building if necessary. The work may therefore be depended on to fit accurately and go together without difficulty. This will enable any practical mechanic to erect the work intelligently.

NOTE

In ordering or inquiring for prices, always submit the following particulars:

DESCRIPTION

- a*—State if only Sash, Doors and Transoms are wanted or the Front with Paneling, etc., complete as shown in elevations.
- b*—State if wanted glazed or open and if glazed with what kind of glass, D. S. Sheet or Plate.
- c*—State if Front is for frame or brick building.

MEASUREMENTS

- d*—Give width of opening between grounds or where Pilasters and Casings are wanted from outside to outside of finished front.
- e*—Give height in clear, and when Cornice or Head-Trim is wanted give extreme outside height also.
- f*—Give depth of recess, if any.
- g*—Give size of Doors and state if they are to be rabbeted.
- h*—Give thickness of Sash and Doors.
- i*—The regular height of Paneling under sash is 22 inch; if any other height is desired, order must so state.

DIRECTIONS NECESSARY FOR ORDERING STAIRS and STAIR RAILING.

When a flight of stairs is wanted, we should know the height of story from top of finished floor to top of finished floor, width of joists in second story, width and run of stairs, the size of cylinder, style of base used in the hall, with rough sketch showing about the shape of stairs wanted, and measurements of rooms on first and second floor where stairs are located; measurements taken inside plaster line.

For STAIR RAILING—Straight Flight.

We require the width of rise and step as sawed out on string board, the number of risers, the size of cylinder from face to face of string or face board, which way it turns at head of stairs, and the number of feet of straight rail required at landing. Unless we receive plan showing otherwise, we always suppose the top riser for a straight flight of stairs to be placed at the edge or spring of cylinder.'

For CIRCULAR or WINDING STAIRS.

We should have an exact plan of stairs as built, giving the width of rise and step, the location of risers in cylinder, etc.; and, when there are straight steps below or above the cylinder, always give the distance from the first square riser to the edge or spring line of cylinder, on the face of string or face board. *Always write your address in full on the plans.*

Mantels

On the following pages we show our line of Mantel designs. All of our Mantels are made of thoroughly seasoned kiln dried lumber. The finish and workmanship is first-class and equal to any on the market.

OUR SPECIAL MANTELS

B 150

Cypress Unfinished.

Height, 6 feet 8 inches. Widths, 4 feet 6 inches and 5 feet. Hard Metal Lights, 14x28 inches.
Pilasters, 3½ inch face, fluted. Mirror, 18x36 inches square.
Case, 9 inches deep on inside.

FOR PRICES SEE PRICE FOLDER

OUR SPECIAL MANTELS

A 205

Plain Oak and Birch Mahogany. Gloss finish.

Height, 6 feet 8 inches. Width, 4 feet 6 inches. Profile, 3 inches. Tile opening 36x36 inches.

Columns, 2½ inches, tapered. Mirror, 14x24 inches square.

Loose wall plates to make width 5 feet. Profile 3¾ inches.

PARQUETRY

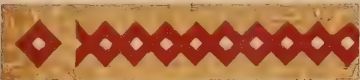

Consists of Strips and Blocks of Hardwood, Fastened Together at Edges and on Backs,
in Slabs of Convenient Size for Laying.

Below we present some of our popular Border patterns in 10 and 12-inch widths, which can be used with Flooring Strips or Wood Carpet to widen them as desired, and with Flooring Strips for fields, fine results are gained.

Where floor plans are sent us for estimate, we are pleased to make up combinations of borders and fields to suit and harmonize with the hardwood trim and furnishings of each room.

FLOORING STRIPS, WOOD CARPET, PARQUETRY $\frac{5}{16}$ -inch Thick, Square Edged.

These floors have become so thoroughly established as to the plans of manufacture in $\frac{5}{16}$ -inch thickness, and the simple method of laying them on new or old floors, that no extended description other than the designs offered in this book is considered necessary.

FLOORING STRIPS

12 foot bale of 2-inch oak containing 500 lineal feet.

Either 1½ or 2 inch face are used as fields in connection with Oak Carpet margin or Parquetry Borders. They are laid directly on the under floor, and braded down. The different lengths are baled separately.

Price Per Square Foot. 4 Foot and Longer.

$\frac{5}{16}$ -inch thick, square edge.	Width 1½ to 2 inches	Width ¾ to 1 inch	Width under ¾ inch
Quartered White Oak	\$0.14	\$0.21	\$0.28
Mahogany, dark color40	.60	.80
Cherry, Dark Oak or Walnut25	.38	.50
Maple, clear white16	.24	.32

WOOD CARPET

Is made in 27 and 36-inch widths in rolls of four yards; it can be cut in narrower widths for use as required.

Per lineal Yard	18 inches wide	27 inches wide	36 inches wide
Quartered White Oak	\$0.85	\$1.20	\$1.50
Oak, Walnut95	1.30	1.65
Walnut and Cherry	1.30	1.90	2.35

**BLOCK FLOORING**

Is cut from Oak Carpet $\frac{5}{16}$ -inch thick, the slats are glued to canvas, but the edges are not glued. These Blocks can be laid between Flooring Strips, making Border effects, or laid diagonally as fields with half blocks at the border line.

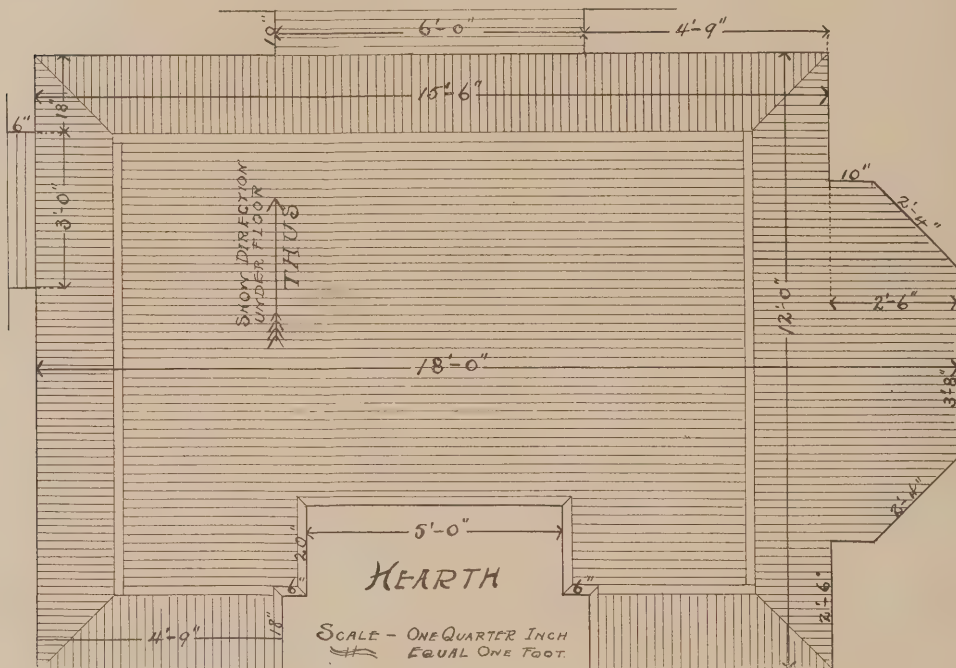

Cut from Quartered White Oak Carpet 1½-inch slat
9 x 9 inches, or larger, per square foot **\$0 18**

All prices named are for goods $\frac{5}{16}$ -inch thick, and for the goods uncut and measured before laid.

We use no plain sawed or red oak. All our oak is the quarter-cut white.

DIRECTIONS for MEASURING

Give each distance separately where the wall is broken by bay window or hearth, and in addition mark the extreme length and width. Mark the direction of the under floor so that our material may be planned to run in opposite direction

DIRECTIONS for LAYING and FINISHING

Remove the quarter-round, and measure off on the floor the plan, as shown in the working drawing, which we supply with our material.

Drive $1\frac{1}{4}$ inch No. 15 wire brads in rows about 9 inches apart, placing a brad at each edge of each slat, then with a punch, sink each brad about $\frac{1}{16}$ -inch below surface of the wood.

Go over the floor carefully with a steel scraper wherever uneven joints or roughness is found, or any hammer marks appear, after which sand the surface with No. $1\frac{1}{2}$ sandpaper, first with the grain then across. A Weighted Floor Brush with sandpaper under will lighten this work

Putty each brad hole to match the wood then sand again lightly to clean the surface of filler and putty marks.

Clean off the floor carefully, then apply Paste Wood Filler with a brush going over no more surface than will admit being cleaned off before hardening. After the Filler is set, rub off with cloth or excelsior, allow the Filler twelve hours at least to dry.

Wipe the floor off thoroughly, and apply a coat of Shellac or best Floor Varnish, then polish with "hard wax" finish, rubbing first across the grain and with the grain afterwards. The Weighted Floor Brush (25 pounds) is necessary for this polishing.

DIRECTIONS for ORDERING COMPLETE PORCHES

We show below, ground plan and section of porch, and when asking price or ordering *complete porches* a ground plan and section, similarly drawn giving measurements as requested and indicated by dotted lines, must positively be furnished.

In making your drawings it is not necessary to draw to scale, just a rough pencil sketch showing location of columns, newels, steps and line of building with measurements is sufficient.

GIVE FOLLOWING MEASUREMENTS:

From "A" face of building to "B" outside of rough framing.

" "C" outside of rough framing to "D" outside of rough framing.

" "E" face of step stringer to "F" face of step stringer.

" "F" face of step stringer to "G" outside of rough framing.

" No. 1 grade line to No. 2 top of porch floor.

" No. 2 top of porch floor to No. 3 top of columns.

" No. 3 top of columns to No. 4 top of cornice.

Width of plancier, width of rafter. Show number of columns wanted, how placed, and width between each.

In ordering interior caps, state kind of wood, viz.: Oak, Birch, Mahogany, etc., or whether for painted work. State exact return or thickness of pilaster. All capitals listed under the heading "Exterior" can also be furnished for interior plaster finish.

The prices on pilaster capitals are based on half square capitals only. Capitals over half or full square will be same price as corresponding column capitals

Above Prices Subject to Discount.

WIRE GLASS

RECOMMENDED BY THE BOARDS OF FIRE
UNDERWRITERS OF ALL PRINCIPAL CITIES
IN THE UNITED STATES AS A PERFECT
FIRE RETARDANT

Some Advantages of "Wire Glass" Windows

They offer a positive resistance to spread of fire.
Shutters must be opened for lighting, closed for protection.
Windows are shut nine times where shutters are closed once.
Closed shutters hinder the watchman from detecting an interior fire.
"Wire Glass" windows aid the watchman; the blaze will reveal the fire.
Closed shutters are an obstacle to the fire department.
"Wire Glass" windows can readily be broken through by the axes in the hands of the firemen.
"Wire Glass" windows admit light, giving access to the building at all times without the labor of opening shutters.
"Wire Glass" in approved metallic frames or sashes will reduce rate of insurance in many cases 10% or more.

FULL SIZE DETAILS OF "WIRE GLASS"

SHOWN IN ILLUSTRATIONS

POLISHED A product equal in strength with respect to the fire and break hazards, to the better known Ribbed, Maze and Rough or Hammered "Wire Glass," and possessing at the same time complete transparency and adaptable for all purposes where "Wire Glass" is demanded together with an unobstructed vision.

MAZE Patterned also in accordance with Edward Atkinson's specifications for the maximum diffusion of daylight. It is the ideal surface for high-class mercantile structures, office buildings, hotels, apartment houses, colleges and schools, and all places where greatest distribution of daylight is desired, together with exclusion of vision.

RIBBED Adapted to skylight service in factories, warehouses, piers, power plants, etc. It is patterned in accordance with Edward Atkinson's specifications for maximum diffusion of light.

ROUGH A semi-transparent fire-retardant glass for use where complete vision or decorative effect is not particularly essential. Used in skylights, windows and doors of all classes of buildings, and most extensively employed in factories, mills, warehouses, train-sheds and power buildings.

3023. \$4.80 per square foot.

GLOSSARY OF TRADE TERMS

The definitions below give the meaning of various terms used in this book or in quotations affecting articles described as established by general usage.

APPLYING IN GENERAL.

MEASUREMENTS.

OUTSIDE OPENING—The measurement of any given article from outside to outside. The frame opening. Always should be given in feet and inches.

BETWEEN GLASS—The difference between the outside opening and the total glass measurement of a given window or sash.

FACE MEASURE—The measurement of any part of an article exclusive of any solid mold or rabbet.

FINISHED SIZE—The measurement of any given part of an article over all or including the solid mold or rabbet.

RIPPING SIZE—The size of stock necessary to produce any given finished size. Usually $\frac{1}{4}$ inch over finished size up to 5 inch cuts and $\frac{1}{2}$ inch over above.

MOLDING.

SOLID MOLD or SOLID STUCK—A mold which is worked on the article itself.

APPLIED MOLD—A separate mold applied or attached to any part of an article.

FLUSH MOLD—An applied molding which finishes flush with or below the face or surface of the stiles or rails of the article.

RAISED MOLD—An applied molding which partly covers or which extends above the face or surface of the stiles or rails of the article.

MULLION

An upright or vertical bar, usually wider than the ordinary bar, dividing the glass in a sash, or a wide upright bar dividing two sash in a frame. Applied also to single blinds made to represent pairs.

MUNTIN.

Applies to any short or light bars—either vertical or horizontal—in a sash or in a door between panels not extending the full width or length of the article.

ODD WORK.

This term applies to any article which is not listed under listed sizes, or for which a list must be formed by the application of any of the Foot Notes or Rules for Extras—unless these specifically state to the contrary.

RAIL.

The cross or horizontal pieces of the framework of a sash, door or blind.

STILES.

The upright or vertical outside pieces of a sash, door or blind.

STOCK QUANTITY.

Ten or more of any given article of one kind, size and quality.

STICKING. (See Solid Mold.)

O. G.—A solid mold which is a combination of a cove and a quarter round with no fillet between.—
The standard sticking for doors, sash and blinds.

COVE AND BEAD—A solid mold which is a combination of a cove and quarter round with a small fillet between.

BEAD AND COVE—A solid mold is a combination of a quarter round and cove with a small fillet between and on each side.

OVOLO—A solid mold which is a quarter round with a small fillet on each side.

P.G.—A solid mold which is a long bevel with a small fillet on each side.

APPLYING TO SASH OR WINDOWS.

SASH.

A sash indicates a single piece to fill a given opening.

WINDOW.

A window indicates two pieces—one upper, one lower—to fill an opening arranged to slide vertically.

CASEMENT.

Applies to a sash or pair of sash made to be hung on hinges to swing.

COTTAGE.

COTTAGE WINDOW—A window in which the meeting rails are placed above the center of the opening.

COTTAGE SASH—A sash made to correspond to a cottage window.

FRENCH WINDOW.

A pair of sash made to be hung on hinges like a pair of doors—A long pair of casement sash.

FACTORY SASH OR WINDOWS.

Sash or windows divided into small lights for factory use—The term implies an inferior quality of material for paint, permitting the use of reasonable defects of any nature not weakening the sash.

FULL BOUND.

This term indicates that the sash so described shall have a similar amount of wood in stiles and top and bottom rails, usually described as "same rail all around."

MEETING RAILS.

The rails of a window which meet when the window is hung and closed.

PLAIN RAIL—Meeting rails of the same thickness as the rest of the window.

CHECK RAILS—Meeting rails sufficiently thicker than the window to fill the opening between the top and bottom sash made by the check strip or parting strip in the frame. They are usually beveled.

LUGS OR HORNS.

An extension of the stiles of a window beyond the meeting rails. They are usually molded on the inside of the stile with an O. G. Mold—(O. G. Lugs).

QUEEN ANNE.

Windows or sash divided into small lights.

SUSPENDED LIGHTS.

A term applied to a light within a sash, formed by straight bars, any one of which must be attached to the free end or to the beveled joint of other bars or munts.

APPLYING TO DOORS.

ASTRAGAL.

MOLD—For Folding Doors—A strip of molding the length of the door of any desired pattern to be applied to one of a pair of folding doors so as to form a rabbet.

SINGLE—For Folding Doors—A strip the length of the doors with a cross-section usually similar to a letter "T"—used to form a rabbet.

DOUBLE—For Sliding Doors—A pair of strips the length of the doors—rabbeted to receive the doors on the back and molded or grooved reciprocally on the face to make a tight joint.

JOINT—For Sliding Doors—A molding or groove worked reciprocally on the meeting edges of each of a pair of doors to make a tight joint.

BANDED DOORS.

Doors with a thin band or strip—usually molded—on the outside edge of the face of each stile and top and bottom rail—Also called friction strips.

CHAMFERED DOORS.

Doors with the corner of the stiles or rails beveled at an angle of about 45 degrees.

STOP CHAMFER—A chamfer stopped or ended short of the length of the piece chamfered

DOWELED DOORS.

Doors put together with dowels instead of tenons.

DUTCH DOOR.

A door made to be cut horizontally through the lock rail so that the upper part can be opened independently of the lower part.

FOUR-PANEL DOOR.

Unless specifically otherwise stated is understood to mean the standard listed four-panel door No. 200.

FIVE-PANEL DOOR.

Unless specifically otherwise stated is understood to mean the standard listed five-panel lock rail panel door No. 201.

PANELS.

Bevel raised panels are standard.

GRADUATED PANELS.

Doors with cross panels of a different width usually graduated from a wide lower panel to a narrow top panel.

LOCK RAIL.

The center rail of a standard four-panel door.

PANEL—The horizontal panel of a standard five-panel or similar door.

TENONS.

THROUGH TENONED—A door made with tenons on the ends of the rails mortised or tenoned through and showing on the outside of the stile.

BLIND TENONED OR MORTISED—A door made with the tenons on the ends of the rails mortised into but extending only part way through the stile.

APPLYING TO BLINDS.

BLIND.

SINGLE—A single blind is one piece to fill a given opening.

PAIR—A pair of blinds is two pieces to fill a given opening, made and rabbeted to fold.

SET—A set of blinds is more than two pieces for a given opening made to fold upon each other,

STATIONARY SLAT BLINDS.

Blinds with slats mortised into or so attached to the stiles as to be fixed.

HALF STATIONARY BLINDS—Blinds with one panel of movable or rolling slats, and one of stationary or fixed slats.

SHUTTERS.

Blinds with solid panels instead of slat panels.

BEAD AND BUTT SHUTTERS.

Shutters with panels flush with the stiles and rails on one side and with beads lengthwise of the panels, at or near the stiles on one side only.

FLUSH MOLD.

See Flush Mold under "General."

APPLYING TO TERMS AND DISCOUNTS.

CAR LOTS.

Quantities of mill work sold at one time for shipment at one time which aggregate the minimum weight allowed by the published railroad tariff for the given destination—usually 24,000 pounds.

LOCAL OR WAY FREIGHTS.

Terms applied to sales or shipments which for any reason take less than car lot rates of freight

CASH DISCOUNT.

A discount allowed for payment of an invoice within a specified time from date of invoice. It does not apply to any freight or other allowance, which should always be deducted before cash discount is taken.

F. O. B. OR FREE ON BOARD

This term indicates that the quotation or sale is made for goods on the cars at seller's shipping point without charge for loading or handling.

FREIGHT ALLOWED.

Signifies that the seller will allow the purchaser on presentation of paid freight bill to deduct from settlement the full amount of freight paid on any given shipment from shipping point to destination. It does not guarantee the safe delivery of goods.

FREIGHT EQUALIZED.

Signifies that the seller will allow the purchaser on presentation of paid freight bill to deduct from the settlement an amount equal to the excess—if any—of the amount paid for freight over the sum which the buyer would have had to pay on a similar shipment from the point equalized with. It does not guarantee safe delivery of goods.

OPENINGS.

Quotations are frequently made at a specified discount for a given number of openings.

In this connection an opening is understood to mean

One Door or two Cupboard Doors.

One Window.

Two Sash.

One Pair of Blinds or two Single Blinds.

STOCK GOODS OR STOCK ITEMS.

Terms frequently used in quotations to indicate such listed sizes as are regularly carried in stock by the party quoting. Must not be confused with "listed sizes" which may be "stock sizes" in one locality and not in another.

NATIONAL MOULDING BOOK

CONTAINING THE LATEST STYLES OF

MOULDINGS

Interior House Finish, Stair and Porch Railings,

AS WELL AS FULL SIZE CUTS OF FRAMES IN USE
IN DIFFERENT LOCALITIES,

NUMBERS COMMENCING AT 5000,

CUTS GIVING EXACT SIZE OF EACH MOULDING, WITH FIGURES REPRESENTING
THE RIPPING WIDTH OF LUMBER.

ADOPTED MAY 3, 1901, BY

The Wholesale Sash, Door & Blind Manufacturers' Association of the Northwest

AND BY

The Eastern Sash, Door & Blind Manufacturers' Association.
